PROFILE

GTM and revenue operations leader with 6 years of experience building go-to-market engines from zero. First sales hire at Inkbit: built Salesforce and later HubSpot as the company's source of truth, launched a contract manufacturing business from $0 to $1M in two years, ran weekly pipeline and forecast reviews with the C-suite, and built multiple AI agents to simplify outbound.

SKILLS: Salesforce & HubSpot Admin | Claude Code | HubSpot API | Clay | ZoomInfo | Make.com | SQL

PROFESSIONAL EXPERIENCE

Inkbit, Boston, MA

Sales and Operations Lead — June 2025 – Present

Sales Lead — May 2024 – June 2025

- **CRM:** Led the Salesforce-to-HubSpot migration and made HubSpot the single source of truth across the company. Trained 15 users and built Make.com automations across the order-to-delivery workflow.
- **AI Agents:** Built multiple agents and skills published to Inkbit's library, for example a prospecting agent that pulls uncontacted HubSpot leads via the HubSpot MCP server, researches accounts, verifies emails through Clay and drafts outreach saving 2 hours per week.
- **Pipeline & Forecasting:** Ran weekly pipeline and forecast reviews with the C-suite across 3 business units, managing a $5M pipeline. Tied marketing spend to booked revenue, which justified doubling trade shows (2 to 4) and increasing Google Ads budget. Hit 200% of quota in 2025.
- **GTM Stack:** Connected Clay, ZoomInfo and Wiza to HubSpot for ICP-segmented prospect lists, and rebuilt quoting with Stripe online payment, cutting quote time from 3 hours to 10 minutes.
- **Growth:** Grew the contract manufacturing business from launch in May 2023 to $1M in 2025 ($70k to $250k to $1M), more than tripling revenue each year.
- **Land & Expand:** Landed a Fortune 50 account with a first order under $1k in 2024, expanded it across 5 groups in 2025, and signed a $1.5M development agreement, bringing total contracted value to $2M+.
- **Positioning:** Used customer discovery to refocus Inkbit's GTM from general plastics to elastomers, rebuilding messaging and target segments. Elastomers now make up 80% of revenue.
- **Internal Tools:** Built 3 apps and 8 dashboards by using Claude Code and SQL. Released apps through Bitbucket for the wider team, resulting in 1 hour saved per operator per day and decreasing late orders by 80%.

Business Development Manager — July 2020 – May 2024

- **Sales Function:** First sales hire. Built the sales function from an Excel tracker to a 3-person team with a CRM, pricing model, partner channel and sales playbook.
- **Salesforce:** Built Salesforce from scratch (custom objects, dashboards, Propel, website form integration) and routed inbound leads by rep expertise and capacity, cutting form-to-response time to under 2 hours.
- **Business Model & Pricing:** Led the 2023 shift from selling equipment to contract manufacturing services, building a pricing algorithm from a ground-up cost model and doubling prices across all offerings.
- **Partners:** Built a sales partner program with 10+ partners across North America, Europe and Asia, doubling leads. Wrote the sales playbook and trained reps and partners.

EDUCATION

Chalmers University of Technology, Gothenburg, Sweden — June 2020

M.Sc. Management and Economics of Innovation

B.Sc. Industrial Engineering and Management (financial mathematics minor)

PERSONAL PROJECTS

- **Job-search lead engine AI agent:** Triaging LinkedIn job postings from email job posting notifications by using Gmail MCP, Claude Code and Supabase MCP, leading to 900 jobs evaluated.
- **Personal finance app:** Personal Vercel and Supabase hosted app built to keep track of personal finances, including Claude API transaction categorization.
